## Water Barrier with Detector

- Water Tray with Leak Detector Kit can be used for 3, 4 or 5-stage standard RO or filter configuration
- Prevents small leaks from damaging floors, walls or counters
- Capture leaking water before damage occurs
- Use Water Tray alone or with Vertex ProTekk mechanical leak detector to shut off feed-water when leak occurs

The Vertex Protekk Water Tray with Leak Detector is a drip-tray that provides water barrier protection for 3, 4 or 5 stage Reverse Osmosis or systems that are set-up in a standard sump configuration. Easily install and attach the tray underneath new or existing systems to catch water leaks and prevent them from damaging floors, walls and counters. Convenient clamp secures drip tray to filter assembly. Designed to be used with the Vertex mechanical leak detector that will shut off feed-water when a leak is detected. Comes with everything needed to attach to filter housing, or place on floor.
